

ASPN-ALT-GO-F-08

Genomic map of the TUM5 gene region on chromosome 10p11.2. The map shows the gene structure with exons and introns, and the location of the TUM5 gene. The TUM5 gene is located on the right side of the map, spanning from approximately 10p11.2 to 10p11.1. The TUM5 gene is shown with its exons and introns, and the location of the TUM5 gene is indicated by a black box.
